

## StaffAlerter Industry Applications

StaffAlerter is an advanced Emergency Notification Service and Control solution that offers best-of-breed capabilities for organizations of any size. With StaffAlerter, you can enjoy situational awareness, command and control, and group notification services to keep your employees, customers, students, or parents informed and safe.

StaffAlerter is a versatile solution that can be tailored to meet the specific needs of different industries. For hospitality, StaffAlerter provides protection for workers during emergency events, as well as door monitoring. In schools and government organizations, StaffAlerter offers a full array of features to support teachers and staff during emergency events, and provides building-wide paging, phone system integration, access control, and monitoring of HVAC and refrigeration systems, as well as parent and student notifications for late starts and closures.

For assisted living facilities, StaffAlerter offers resident notifications, facility monitoring, and safety for staff through the use of Personal Alert Devices (PAD) and tracking with Geo Fencing for at-risk residents. In manufacturing settings, StaffAlerter provides process and production monitoring, access and security control, and monitoring utilizing multi-sensor detection for any environmental event.

StaffAlerter leverages the latest in IoT technology, cloud services, and communications through its advanced distributed architecture. It operates over both Wi-Fi and cellular networks, ensuring that any message for any person or group will be delivered regardless of the facility's power or network status.

In summary, StaffAlerter is the only solution you need to provide the best of breed Emergency Notification Service and Control for your organization. It offers a wide range of features and benefits for different industries, including hospitality, schools and government, assisted living, and manufacturing. Choose StaffAlerter to monitor systems and devices in any facility and keep your employees, customers, students, or parents informed and safe.
